EDUCATION

INSTITUTE OF INFORMATION TECHNOLOGY   **Jan 2019 - Jul 2021**

 Advance diploma

computer science /diploma

WORK EXPERIENCE

software engineer, Flexisaf   *Jan 2021 - Present (2y 8m)*

● Designed and developed cutting-edge software applications through collaboration with a talented team.
● Collaborated with a talented team to design and develop cutting-edge software applications, including SafApply and NECO, aimed at streamlining and enhancing school management processes.
● Designed and implemented frontend-to-backend communication using RESTful APIs, allowing for efficient data retrieval, manipulation, and synchronization between the user interface and server.
● Collaborated with diverse teams to ensure on-time software delivery within budgetary and timeline constraints.
● Collaborated with backend developers and QA teams to troubleshoot and resolve API-related issues, fostering a collaborative approach to delivering reliable and high-performance software solutions.
● Expertly integrated Redux for efficient state management, ensuring seamless data flow and synchronization across complex React applications.

Frontend Engineer, Aspace life   *Jan 2020 - Feb 2021 (1y 1m)*

● Created dynamic Vue.js data visualizations for extensive datasets, providing valuable insights.
● Utilized Agile methods for UI component design in Ecommerce systems, ensuring a smooth and optimized user experience.
● Implemented Vuex to synchronize complex frontend application states, improving overall flow and performance.
● Developed API-driven backend services with Node.js, leveraging REST principles for efficient data exchange between frontend and backend.

- Employed an Agile methodology to design and develop UI components,
- experiences and efficient data management.
- Implemented Vuex for efficient state management, enabling seamless data flow and synchronization between components for complex frontend applications
